Workshop Description

Designing differentiated instruction based on educational neuroscience research may seem like an overwhelming

- Learn three elements of successful “brain-friendly” learning: emotions, relevancy, and engagement.
- Understand some basics of neuroplasticity.
- Learn how to differentiate for each student by surveying prior knowledge and discovering strengths.
- Revisit how understanding students’ Multiple Intelligences can be helpful when designing differentiated instruction.
- Discover some simple techniques to manage the differentiated classroom.
- Leave with a variety of flexible grouping strategies.
