What People Say of the Institute in 2018...

- Gives me a clearer picture of what is DI and how to conduct DI
- Very relevant to the work in school. I gained a deeper understanding of C-A-1 connections, differentiation as a way of thinking about T&L; some very useful insights gained example KUDs as an anchor. Thank you so much!
- It provides most recent evidence-based DI.
- Provided a good overview of what differentiation is about – good range of practical examples to be applied in classes.
- It has helped me to discover the importance of quality teaching and learning and how to

get there.

- New perspectives on differentiation and reframing of teacher mindset.
- The “instrumental” component was particularly useful in the context of my work.
- It was an excellent workshop and the participants worked very hard to provide one another with feedback on how to improve teaching and learning.
- The facilitators were very passionate, knowledgeable and approachable.
- The workshop really helped me a lot in planning and understanding what I should focus on. It really aligned and realigned my thinking and approach.
- The workshop is content intensive and I have a better understanding of DI and what it involves especially the different DI strategies beyond JIGSAW and Tired Assessments which I have used.
