

Bringing Singapore to the World

In addition to offering inbound study-tour services to overseas clients, PAI offers outbound services for local educators and student groups seeking to enrich themselves with additional overseas exposure.

With an international network of established overseas education institutions as our partners, we are able to provide a quality experience that is both immersive and enriching to our local educators and students.

For School principals, PAI works closely with the Academy of Principals (Singapore) to provide a range of Sabbatical-related services for our principal members. Our services range from recommending suitable contacts from local and overseas organizations to designing custom-made packages as according to our principals' needs.

PAI also provides overseas training and immersion trips for our local educators, providing specialized programmes for Teachers, Head of Departments and School Leaders.

Taking into consideration of the interests and expectations of our participants, we provide customized itinerates and programmes that will be best suited to the nature of the study tour group.

If you are keen to engage us for study tours or sabbatical arrangements, please do not hesitate to request for a proposal based on your needs at info@pai.sg.
